Company Overview

Sky5G is a regional internet service provider delivering high-speed 5G fixed wireless broadband to homes, businesses, and government organisations across North West Queensland. Founded in 2016 by William Harrington on his family property in Richmond, QLD, the business has grown from a single fixed wireless link to a network serving 10 towns across the region.

Sky5G is powered by Wi-Sky Queensland Pty Ltd, a trusted regional connectivity provider with over a decade of experience delivering internet solutions to remote and rural communities.

Services

5G Fixed Wireless Broadband	Wi-Sky Fixed Wireless	Network Infrastructure
High-speed internet for homes and businesses with symmetrical speeds up to 1 Gbps. Plans from $99 to $999/month with unlimited data.	Reliable broadband for areas outside our 5G footprint. Affordable connectivity for homes, stations, and businesses in remote locations.	Tower construction, antenna installation, network design, and ongoing maintenance. Full end-to-end infrastructure capability.

Coverage Area

Sky5G currently provides 5G fixed wireless broadband across **10 towns** in North West Queensland:

Richmond | Julia Creek | Hughenden | Cloncurry | Winton | Croydon | Georgetown | Normanton | Karumba | Dajarra

Key Personnel

William Harrington	Founder & Technical Director	PhD in rural technology adoption. Over a decade of experience in regional wireless infrastructure design, deployment, and operations.
Hollie Harrington	Accounts & Customer Care	Manages billing, customer accounts, and administration. Primary point of contact for account enquiries and customer service.

Nyssa Currin	**Project & Administration Manager**	Oversees daily operations, project management, and administration. Based in Julia Creek. Qualifications in Agribusiness and Safety.

Why Sky5G

- **Locally Owned & Operated** — Based in Richmond, QLD with staff across the region. Not a call centre, not a city-based reseller.

- **10+ Years Regional Experience** — Proven track record delivering internet infrastructure to remote and rural Queensland since 2016.

- **End-to-End Capability** — We own and operate the entire network, from tower infrastructure to customer premises equipment.

- **Built for Harsh Conditions** — Infrastructure designed and tested for extreme heat, storms, and the demands of outback Queensland.

- **Flexible & Scalable** — Month-to-month contracts, scalable plans from residential to enterprise-grade with SLA guarantees.

- **Community Commitment** — Active sponsor and supporter of local events, organisations, and community groups across the region.
